

General Info: Virtual Symposium to Observe World Antimicrobial Awareness Week “Applications of Biotechnology and Microbiology with Special Emphasis on Antimicrobial Resistance”

The virtual conference to observe world antimicrobial awareness week was organized between 18-24 November 2020 by B. S. Abdur Rahman Crescent Institute of Science and Technology (BSACIST), Chennai, Tamil Nadu, India, in association with Microbiologists Society, India. The Biotech Students Association from the School of Life Sciences, along with the faculty, coordinated the event. The symposium lasted for a week and conducted various events and discussions to cater to all levels of academia. On the 18th of November, the symposium commenced with a carefully curated quiz on microbiology. The same afternoon an insightful talk was delivered by Dr. Mukleshur Rahman from the University of East London, United Kingdom. The 19th of November was dedicated to debating. Participants from across the nation discussed various topics regarding antimicrobial resistance, vaccines, medical awareness and herbal advancements. This was followed by a slogan contest on the 20th of November, a painting contest on the 21st of November and a photography contest on the 22nd of November. All three events received a myriad of creative responses from both students and scientists.

The 23rd and 24th of November were allotted for scientific discussions. An e-poster competition and oral presentation competition related to antimicrobial awareness and advancements were conducted. The scientific events helped to see the different perspectives of the matter and helped advance knowledge of it. The presentations were made by young researchers, academicians, industrialists and shared their research experiences and eventually concluded with an exchange of knowledge in the areas of emerging antimicrobial resistance.
