

## **General Info: The Sixth International Meeting of Pharmaceutical Sciences (RICiFa), November 10-12, 2021, Córdoba, Argentina †**

**Received: 26.04.2022; Revised: 4.05.2022; Accepted: 6.05.2022; Published: 8.05.2022**

The sixth International Meeting of Pharmaceutical Sciences (RICIFA) was held between November 10, 11 and 12, 2021 in Córdoba, Argentina. The meeting was organized by research professors from the National Universities of Córdoba and Rosario in collaboration with CAS (A division of the American Chemical Society); Blood products (UNC Pharmaceutical Laboratory); ACCA (Academic Club); ANLAP (National Agency of Public Laboratories) and with the academic endorsement of the FCQ (Faculty of Chemical Sciences); UNC (National University of Cordoba); I+D+i Agency (National Agency for the promotion of Research, Technological Development and Innovation); CONICET (National Council for Scientific and Technical Research); UNR (National University of Rosario; Faculty of Biochemical and Pharmaceutical Sciences).

Its objective is to promote a space for integration and scientific knowledge for its attendees, in an academic and social framework. The activities developed during this meeting cover all areas of Pharmaceutical Sciences: Pharmacobotany, Pharmacognosy, Pharmacology, Medicinal Chemistry, Drug Quality Control, Microbiology, Pharmaceutical Technology and Biotechnology, Clinical and Healthcare Pharmacy, and Education.

Its purpose is to bring together researchers, scholars, health professionals and students of Pharmaceutical and related Sciences, in order to contribute to the development and consolidation of said discipline at a national and regional level using the contributions made by outstanding local and foreign researchers. who are present at these meetings.

In this way, the integration of knowledge between the academic and productive sectors (public and private) in contemporary topics of Pharmaceutical and Health Sciences is promoted.

Giving rise to the presentation of innovations that allow to acquire experience in pursuit of the interdisciplinary development of scientific and technological research.

Finally, it is recorded that the authors present in the same stated that neither the manuscript nor parts of it are considered for publication in other journals at the time of submission.
